

Faux Stone Effect on Fabric

Creating interesting texture on fabric is easy with Fabric Magic and Colorant from Earth Safe Finishes. These no-VOC or low-VOC products are earth-friendly and gentle on artists with chemical sensitivities.

Materials

- Fabric Magic
- Generation Green Colorant in desired color
- Water
- 100% cotton fabric (the sample used a piece of rust-dyed muslin)
- Plastic garbage bag
- Clean empty plastic container, such as a cottage cheese carton

Instructions

1. Mix ½ cup water, 1 drop Colorant, and 1-2 drops Fabric Magic in the plastic container. (In this concentration, there will be no change in the hand of the fabric.)
2. Wad dry fabric up with your hands. Immerse in the Fabric Magic mixture. Allow the fabric to absorb the liquid for a few moments.
3. Remove the fabric wad from the Fabric Magic mixture and spread flat on the garbage bag to dry.
4. When the fabric is dry, peel it gently from the plastic bag.
5. Iron with a dry iron. Allow it to cure at least 48 hours before laundering.

See Fabric Magic and Generation Green Colorants from Earth Safe Finishes on their website <http://www.earthsafefinishes.com/products.html> under the Additives banner.

This is a photo of the same technique on unbleached muslin (with no rust).
